PART XI
INDEX TO JOURNALS AND SERIAL

INTRODUCTION

This section is straightforward and needs little introduction. Abbreviations used in journal titles have been taken from the *World List of Scientific Periodicals* [b6481]. Papers with multiple authors are listed under the senior author only, and it has been found necessary to occasionally truncate the author's name to keep the listings orderly. When this has been done it is indicated by using a '*' at the end of the name. For convience a few publications which were issued in parts with various authors have been treated as if they were journals (i.e. **Coll. Selys Longchamps**).

GENUS-GROUP NAMES NEEDING ADDITIONAL RESEARCH

Listed here are entries extracted from Part III that require additional research, or action by the ICZN, etc.

d Acanthagyna Kirby, 1890, (JOS & PD) **OD:** Syn. Cat. Neurop. Odonata :94 [b3295]. **TS:** Gynacantha nervosa Rambur, 1842. **OD:** Ins. Névr. :213 [b5000]. **TM:** by subsequent designation by Cowley, 1934. Entomologist 67:200 [b1495]. **OS:** Gynacantha Rambur, 1842. [*Check - Because the true type of Gynacantha is really trifida, not nervosa, this name is not really a junior objective synonym of Gynacantha. However such a change in the use of Gynacantha would greatly upset nomenclature, so I have not made it. A case for the ICZN.*] [Refs - b1573; b3295; b1495]

c **Africaliagma** Kennedy, 1920 **OD:** Ohio J. Sci. 21:87 [b3134]. **TS:** Agrion glaucum Burmeister, 1839. **OD:** Handb. Ent. 2(II)(2):821 [b0973]. **TM:** by original designation. **SS:** Enallagma Charpentier, 1840. [*Check - Could be a JOS if glaucum is type of Disparoneura*] [Refs - b1572; b3134; b5981]

a **Agriocnemis** Selys, 1877 **OD:** Bull. Acad. r. Belg. (2)43:134,142 [b5518]. **TS:** Agrion pygmaeum Rambur, 1842. **OD:** Ins. Névr. :278 [b5000]. **TM:** by subsequent designation by Fraser, 1949. Trans. R. ent. Soc. Lond. 100:136 [b2246]. **HC - Zyg: Coe: Coe: Agriocnemidinae** [*Check - At various times the type species has been considered to be lacteola, pygmaeum and rufipes. From a strictly nomenclatural point of view the name dates from 1869, when Selys first used it, and the type is rufipes, the only valid species included by Selys (b5493 :24). However such a change would greatly upset nomenclature, so I have not made it. A case for the ICZN.
